# Quality Inspector by DataSentics

Industry-specific solution developed by  
DataSentics and powered by the  
Databricks Lakehouse Platform

## Automate your production quality control

Quality control is a crucial aspect of any production process, but traditional methods can be time-consuming and prone to human error. **Quality Inspector** by DataSentics, an Atos company, offers a solution that is both efficient and reliable. With out-of-the-box models for visual quality inspection, which are tailored to meet your specific requirements, you'll experience stable, scalable quality control that's easy to improve over time. DataSentics' highly precise and efficient tailoring process allows them to quickly adapt models to your business needs. **Quality Inspector** is an end-to-end solution that can be seamlessly integrated into your existing setup, delivering high performance and reliability.

- Achieve more than 99.8% accuracy
- Reduce your quality control time by up to 90%
- Automate even the most challenging use cases such as use of 3D cameras, heat cameras, etc.

Deliver AI innovation faster with Solution Accelerators for popular industry use cases. [See our full library of solutions →](#)
