databricks

Solutions Architect

General interview process overview

1) Recruiter Screen (30 minutes)
2) Hiring Manager Interview (1 hour)
3) Technical Screen (1 hour)
4) Coding Assignment
5) Full Panel (combination of 2–3 interviews at 1 hour each)
6) Presentation (1 hour)
7) References
8) Offer

Hiring Manager and Panel Interviews

- **Hiring Manager:** Background/experience, motivation to join Databricks, Databricks offerings, examples of deals (wins and losses), building and scaling the business, and data and AI knowledge

- **Technical Screen:** Data storage layer (data warehouses and data lakes), data pipelines/solutions data pipe (analytical stacks, machine learning applications), scaling and productionizing data systems, cloud and platform architecture, and working with customers

- **Coding Assignment:** Problem-solving, feature implementations, data frame operations (Python or Scala)

- **Field Engineering Leadership (optional):** Regional growth plans, career growth, your potential impact at Databricks, and company culture

Presentation

During the presentation, you will provide your strategic approach to a hypothetical scenario that tests your ability to understand, present, and sell Databricks technologies. You'll act as a Solutions Architect, asking questions to understand customer needs and then pitching Databricks' value proposition and appropriate solutions.
